

Roominate

Pre-Production Test Cases

iOS App · QA Checklist for Production Deployment

Priority order for production go/no-go: Auth flows (\$1–\$6) → Core feed + detail (\$7–\$9) → Chat (\$14–\$15) → Create post (\$11–\$12) → Profile management (\$16–\$18) → Edge cases & security (\$23–\$25).

1. App Launch & Session Management

#	Test Case	Steps	Expected Result
1.1	Cold launch — no prior session	Install fresh, open app	Splash → Onboarding screen
1.2	Cold launch — valid token stored	Log in, kill app, reopen	Splash → Home (skips auth)
1.3	Cold launch — expired/invalid token	Corrupt or expire token, reopen	Splash → Onboarding (token cleared)
1.4	Cold launch — profile incomplete	Complete signup only, kill app, reopen	Splash → Add Profile Step 1
1.5	Splash animation completes	Open app	Logo shows, auto-dismisses, bootstraps session
1.6	No internet on launch	Airplane mode, open app	Graceful error, no crash

2. Authentication — Sign Up

#	Test Case	Steps	Expected Result
2.1	Valid email, submit	Enter valid email, tap Continue	Navigates to Set Password
2.2	Empty email, tap Continue	Leave email blank, tap button	Error shown, button disabled
2.3	Invalid email format	Enter 'user@' or 'user.com'	Email error message shown
2.4	Email with spaces	Enter ' user@test.com '	Trimmed and accepted if otherwise valid
2.5	Tap 'Sign In' on Sign Up screen	Tap the link	Replaces Sign Up with Sign In
2.6	Tap back	Tap back arrow	Returns to Onboarding
2.7	Already-registered email	Submit existing email	API returns error, message shown

3. Authentication — Set Password

#	Test Case	Steps	Expected Result
3.1	Valid password ≥8 chars, matching confirm	Fill both fields correctly	Proceeds to OTP verification
3.2	Password < 8 chars	Enter 'pass'	Form invalid, button disabled
3.3	Confirm password mismatch	Enter different confirm value	Inline mismatch error shown

#	Test Case	Steps	Expected Result
3.4	Empty fields	Leave both blank	No navigation, no API call
3.5	Submit successfully	Valid data, submit	Password set, navigates to OTP

4. Authentication — OTP Verification

#	Test Case	Steps	Expected Result
4.1	Correct 4-digit OTP	Enter valid OTP	Profile complete → Home; incomplete → Add Profile
4.2	Wrong OTP	Enter incorrect OTP	Error message shown, stays on screen
4.3	Partial OTP (< 4 digits)	Enter 1–3 digits, try submit	Button disabled or no action
4.4	Countdown timer	Wait and observe	Timer reaches 00:00, Resend becomes active
4.5	Resend before timer expires	Tap Resend when timer > 0	Resend disabled, no API call
4.6	Resend after timer expires	Tap Resend at 00:00	New OTP sent, timer restarts at 34s
4.7	Tap back	Tap back arrow	Returns to previous screen, timer cancelled
4.8	Sign In OTP flow	Enter correct OTP on login screen	Home or Add Profile based on completeness
4.9	Sign In OTP → first-time user	New user with no password	Navigates to Set Password screen

5. Authentication — Sign In

#	Test Case	Steps	Expected Result
5.1	Valid credentials	Enter correct email + password	Navigates to Home or Add Profile
5.2	Invalid credentials	Enter wrong password	'Invalid credentials' error displayed
5.3	Unverified email	Correct password, unverified email	403 shown, navigates to OTP
5.4	Empty fields	Leave email/password blank	Button disabled, no API call
5.5	Tap 'Sign Up' from Sign In	Tap the link	Replaces Sign In with Sign Up
5.6	Tap OTP login	Tap OTP option	Navigates to Sign In OTP screen
5.7	Tap back	Tap back arrow	Returns to Onboarding

6. Profile Setup (Onboarding — 3-Step)

#	Test Case	Steps	Expected Result
6.1	Step 1: valid name + gender	Fill name, select gender, tap Next	Navigates to Step 2
6.2	Step 1: empty name	Leave name blank, tap Next	Blocked — error or button disabled
6.3	Step 1: no gender	Skip gender, tap Next	Blocked
6.4	Step 2: all required fields	Fill city, profession, org, tap Next	Navigates to Step 3
6.5	Step 2: missing field	Leave any required field empty	Blocked

#	Test Case	Steps	Expected Result
6.6	Step 3: about ≤100 chars	Enter valid bio, tap Finish	Profile saved, navigates to Home
6.7	Step 3: about > 100 chars	Enter 101+ chars	Count turns red, submit blocked
6.8	Step 3: empty about	Leave about blank	Submit blocked
6.9	Step 3: add profile picture	Tap avatar, pick image	Image picker opens, preview shown
6.10	Back on Step 2/3	Tap back arrow	Returns to previous step, data preserved
6.11	Back on Step 1	Tap back arrow	Clears session, returns to Onboarding
6.12	API error on submit	Force network error	Error message shown, stays on Step 3

7. Home Feed — Explore

#	Test Case	Steps	Expected Result
7.1	Default load — Flat listings	Open Explore tab	Flat cards shown with rent, location, image
7.2	Switch to Flatmate tab	Tap Flatmate segment	Flatmate cards shown
7.3	Pull-to-refresh	Pull down on feed	Fresh data loaded silently
7.4	Infinite scroll	Scroll to last card	Next page loads and appends
7.5	End of data	Scroll past last page	No more cards, no error
7.6	Empty state	All filters return no posts	Empty state illustration + message shown
7.7	Search by city	Type city name in search bar	Results filtered by city
7.8	Search debounce	Type quickly	Only one API call after 400 ms pause
7.9	Clear search	Delete search text	Full unfiltered feed restored
7.10	Search returns nothing	Search for non-existent city	Empty state shown
7.11	Tap Flat card	Tap any card	Opens FlatDetailView
7.12	Tap Flatmate card	Tap any card	Opens FlatmateDetailView
7.13	No internet	Airplane mode, open Explore	Error message shown

8. Listing Detail — Flat

#	Test Case	Steps	Expected Result
8.1	All fields displayed	Open any flat listing	Title, rent, location, property type, room type, furnishing, move-in, deposit, utilities, preferences shown
8.2	Author row	Inspect author section	Author name and profession displayed correctly
8.3	Hero image loads	Open listing with image URL	Image renders; placeholder if no URL
8.4	Save/Bookmark — first tap	Tap bookmark icon	Post saved, icon toggles to filled
8.5	Unsave — second tap	Tap filled bookmark	Post unsaved, icon reverts
8.6	'Interested' button	Tap Interested	Chat started, navigates to ChatView

#	Test Case	Steps	Expected Result
8.7	Interested on own post	Tap Interested on your own listing	Should not start chat with self
8.8	Report post	Tap ellipsis → Report	Report sheet opens with reason list
8.9	Back navigation	Tap back arrow	Returns to Home feed

9. Listing Detail — Flatmate

#	Test Case	Steps	Expected Result
9.1	All fields displayed	Open any flatmate listing	Title, budget, location, preferred areas, tags shown
9.2	Save/Unsave	Tap bookmark twice	Save then unsave works correctly
9.3	Interested starts chat	Tap Interested	Chat started, navigates to ChatView
9.4	Back navigation	Tap back arrow	Returns to Home feed

10. Filters

#	Test Case	Steps	Expected Result
10.1	Open filter sheet	Tap filter icon	All filter sections shown
10.2	Adjust rent slider	Drag min/max handles	Min/max rent updated visually
10.3	Select city	Tap a city chip	City chip selected, others deselected
10.4	Select property type	Tap 1BHK / 2BHK etc.	Single selection, chip highlighted
10.5	Select room type	Tap Private or Sharing	Single selection
10.6	Select furnishing (multi)	Tap multiple options	Multiple chips toggled independently
10.7	Select amenities (multi)	Tap multiple amenity chips	Multiple selected
10.8	Move-in date range	Set from/to dates	Dates set and displayed
10.9	Active filter badge count	Apply 3 filter sections	Badge shows '3'
10.1 0	Live listing count	Change filters	Count updates before closing sheet
10.1 1	Apply filters	Tap Apply	Feed filtered, returns to Home
10.1 2	Reset filters	Tap Reset	All filters cleared, badge disappears
10.1 3	Filters persist	Apply filters, navigate away, return	Filters still active

11. Create Post — Flat Listing

#	Test Case	Steps	Expected Result
11.1	Full happy path	Complete all steps with valid data	Post created, Home refreshes
11.2	Property Details: all required	Fill city, type, space, furnishing	Proceeds to Location step
11.3	Property Details: missing city	Leave city blank	Step blocked

#	Test Case	Steps	Expected Result
11.4	Location: Google Places autocomplete	Type area name	Suggestions appear, tap populates fields
11.5	Location: missing area	Leave area blank	Step blocked
11.6	Availability: all fields set	Fill rent, deposit, extra cost, date	Proceeds to Photos step
11.7	Long-term toggle	Toggle 'Looking for long term'	Hides move-out date field
11.8	Move in immediately toggle	Toggle 'Move in Immediately'	Sets today's date as available from
11.9	Availability: missing rent	Leave monthly rent blank	Step blocked
11.10	Photos: 5+ images added	Add 5 or more photos	Step valid, photos previewed
11.11	Photos: fewer than 5	Add only 4 photos	Step blocked with minimum-photo message
11.12	Photos: remove image	Tap delete on a photo	Image removed from grid
11.13	Photos: large image	Add image > 4.8 MB	Compressed before upload, no error
11.14	Preferences: all selected	Choose gender, food, smoking, occupation	Step valid
11.15	Amenities: toggle per-room	Tap amenity chips per room	Selection toggles correctly
11.16	Amenities: add custom	Type and submit custom amenity	Custom tag appears
11.17	Description: non-empty title	Enter title	Step valid
11.18	Description: empty title	Leave title blank	Auto-title built from city/type
11.19	Preview screen	Reach preview step	All filled data displayed for review
11.20	Submit with API error	Force network error on submit	Error shown, stays on preview
11.21	Edit existing post	Open edit from My Posts	All fields pre-filled from existing post
11.22	Edit + submit	Modify and submit	Update endpoint called, listings refreshed
11.23	Dismiss mid-flow	Tap X/dismiss	Returns to Home, no partial post created

12. Create Post — Flatmate Seeker

#	Test Case	Steps	Expected Result
12.1	Location: add preferred areas	Type area, tap add	Multiple area chips shown
12.2	Location: remove area	Tap X on chip	Chip removed

#	Test Case	Steps	Expected Result
12.3	Budget: enter max budget + move-in	Fill fields	Step valid, proceeds
12.4	Budget: move in immediately	Toggle on	Available from set to today
12.5	Property preferences	Select type, room, furnishing	Step valid
12.6	Full happy path	Complete all required fields	Post created successfully
12.7	Missing city / preferred location	Leave blank	Step blocked

13. Saved Posts

#	Test Case	Steps	Expected Result
13.1	Save flat from Home	Tap bookmark on flat card	Appears in Saved → Flats
13.2	Save flatmate from Home	Tap bookmark on flatmate card	Appears in Saved → Flatmates
13.3	Unsave from detail view	Tap filled bookmark in detail	Removed on next load
13.4	Unsave from Saved list	Tap bookmark in saved list	Post removed immediately
13.5	Pull to refresh	Pull down on saved list	Latest saved items reloaded
13.6	Infinite scroll	Scroll to bottom	More items load
13.7	Empty saved list	No saved posts	Empty state message shown
13.8	Persist across app restart	Save, kill app, reopen	Saved posts still shown
13.9	Real-time sync between tabs	Save from Home, switch to Saved	Saved tab reflects change

14. Chat — Chat List

#	Test Case	Steps	Expected Result
14.1	Open Chat tab	Tap Chat in tab bar	All conversations listed with preview
14.2	Other user's name shown	Inspect conversation rows	Correct name, not 'Unknown'
14.3	Latest message preview	Check each row	Text shown, or 'Photo' for images
14.4	Tap conversation	Tap a row	Opens ChatView for that conversation
14.5	Pull to refresh	Pull down	Conversations reloaded
14.6	New chat starts in list	Start chat from listing	Appears at top of Chat list
14.7	Empty chat list	No conversations	Placeholder/empty state shown

15. Chat — Conversation View

#	Test Case	Steps	Expected Result
15.1	Load message history	Open existing chat	Messages shown oldest-first
15.2	Send text message	Type and tap Send	Message appears in right-side bubble immediately

#	Test Case	Steps	Expected Result
15.3	Receive realtime message	Other user sends while chat open	Bubble appears on left without refresh
15.4	Send empty message	Tap Send with blank input	No API call, input stays empty
15.5	Send image	Tap image icon, pick photo	Image sent and shown in chat
15.6	My message bubble alignment	Send a message	Right-aligned blue bubble
15.7	Received message alignment	Receive a message	Left-aligned grey bubble
15.8	Post details card shown	Open chat linked to a listing	Property card shows title, rent, location
15.9	Tap property card	Tap the card in chat	Navigates to listing detail
15.10	Shortlist / Grab Deal	Tap Shortlist button	Marked as grabbed, button disabled
15.11	Grab Deal already done	Re-open chat where deal was grabbed	Button stays disabled (isDealGrabbed=true)
15.12	Block user	Tap Block from chat options	Confirmation shown, block API called
15.13	Block navigates back	After blocking	Returns to Chat list
15.14	WebSocket disconnect	Kill internet mid-chat	Auto-reconnect after ~3 seconds
15.15	Switch to different listing chat	Open second chat	Previous channel unsubscribed, new subscribed
15.16	Close chat view	Navigate back	Reverb unsubscribes from channel
15.17	Send fails — no internet	Airplane mode, tap Send	Error shown, input text restored

16. Profile — View & Edit

#	Test Case	Steps	Expected Result
16.1	Profile screen loads	Open Profile tab	Name, email, city, profession, about, avatar shown
16.2	Tap profile card	Tap the card	Opens ProfileDetailView
16.3	Edit Personal Info	Update name/gender/birth year/city/profession, save	Changes saved and reflected immediately
16.4	Student vs Working fields	Switch profession	Institute shown for Student, Organization for Working
16.5	Edit Contact	Update email and social links	Saved correctly
16.6	Add social link	Tap Add link	New link added to profile
16.7	Delete social link	Tap delete on link	Link removed
16.8	Edit About Me	Update bio text	Saved and shown in profile
16.9	Change profile picture	Pick new image	New image uploaded and displayed

#	Test Case	Steps	Expected Result
16.10	Remove profile picture	Tap remove avatar	Avatar reverts to initials
16.11	Initials computed	User name 'Nandini Vithlani'	Initials show 'NV'

17. Profile — My Posts

#	Test Case	Steps	Expected Result
17.1	View own listings	Open My Posts	All user-created posts shown
17.2	Edit a post	Tap Edit on a listing	Create Post flow opens pre-filled
17.3	Delete a post	Tap Delete, confirm	Post removed from list
17.4	Delete — API error	Force network error	Error message shown, post stays
17.5	Empty state	No posts created	'No listings yet' message shown
17.6	Add new post from My Posts	Tap Add button	Create Post flow opens for new post

18. Profile — Blocked Users

#	Test Case	Steps	Expected Result
18.1	Load blocked users	Open Blocked Users	Blocked users listed
18.2	Unblock a user	Tap Unblock	User removed from list, API called
18.3	Empty blocked list	No blocked users	Empty state shown
18.4	Unblock API error	Force network error	Error shown, user stays in list

19. Report Post

#	Test Case	Steps	Expected Result
19.1	Open report sheet	Tap Report on a listing	Reason picker list shown
19.2	Select reason	Tap any reason	Navigates to description input
19.3	Back from description	Tap Back	Returns to reason picker
19.4	Submit with description	Enter text, tap Report	API called, success screen shown
19.5	Submit without description	Leave description blank, tap Report	Submits (description optional)
19.6	API error on submit	Force error	Error message shown
19.7	Success → Back to Home	Tap 'Back to Home'	Sheet dismisses

20. Delete Account Flow

#	Test Case	Steps	Expected Result
20.1	Open Delete Account	Tap Delete Account in settings	Reason list shown

#	Test Case	Steps	Expected Result
20.2	Select reason + Continue	Choose reason, tap Continue	OTP sent, navigates to OTP screen
20.3	No reason selected	Tap Continue without selection	Button disabled
20.4	Enter correct OTP	Enter valid OTP	Account deleted, token cleared, Onboarding shown
20.5	Enter wrong OTP	Enter invalid OTP	Error shown, stays on OTP screen
20.6	Resend OTP	Tap Resend after timer	New code sent, timer restarts
20.7	Cancel from reason screen	Tap Cancel	Returns to Profile Settings
20.8	API error during request	Force network error	Error alert shown

21. Sign Out

#	Test Case	Steps	Expected Result
21.1	Tap Log Out	Tap Log Out in Profile Settings	Token cleared, navigates to Onboarding
21.2	Reopen after sign-out	Kill app, reopen	Onboarding shown, no session restored

22. Navigation & Routing

#	Test Case	Steps	Expected Result
22.1	Tab bar switching	Switch between all 4 tabs	Each tab loads independently
22.2	Add tab dismissed mid-flow	Tap X during post creation	Returns to Explore, no partial post
22.3	Add tab success	Complete post creation	Returns to Explore, feed refreshes
22.4	Back button on all screens	Tap back on every navigable screen	Correct previous screen, no stack corruption
22.5	Chat → back → back	Navigate from Home → detail → chat → back × 2	Returns to detail then Home
22.6	Profile nested navigation	Navigate into edit screens	Push/pop works correctly throughout

23. Offline / Network Edge Cases

#	Test Case	Steps	Expected Result
23.1	Send message offline	Airplane mode, tap Send	Error shown, input text restored
23.2	Load Home offline	Airplane mode, open Explore	Error shown, empty or cached state
23.3	Submit post offline	Airplane mode, tap Submit	Error shown, stays on preview
23.4	Reconnect mid-session	Re-enable internet	App resumes normally on next action

24. UI / UX Polish

#	Test Case	Steps	Expected Result
24.1	Loading spinners	Trigger any API call	ProgressBar shown while in-flight
24.2	Error messages	Trigger API errors	No silent failures — messages always shown

#	Test Case	Steps	Expected Result
24.3	Buttons disabled during load	Tap Send/Submit while loading	No double-submit possible
24.4	Keyboard dismissal	Tap outside a text field	Keyboard dismisses
24.5	Long text in fields	Enter very long name or title	Truncation handles gracefully, no layout break
24.6	Failed image load	Open listing with broken image URL	Placeholder shown, no crash
24.7	Small screen (iPhone SE)	Run on SE size class	No clipped or inaccessible content
24.8	Large screen (iPhone Pro Max)	Run on Max size class	No excessive whitespace or layout issues
24.9	Scroll performance	Scroll fast through listing feed	No dropped frames

25. Security & Data Integrity

#	Test Case	Steps	Expected Result
25.1	Token storage	Review storage location	Token in UserDefaults — acceptable risk known
25.2	Token cleared on sign-out	Sign out, inspect UserDefaults	Both token and userId removed
25.3	Token cleared on deletion	Delete account, inspect UserDefaults	Both token and userId removed
25.4	Reverb auth header	Inspect WebSocket auth request	Bearer token sent in Authorization header
25.5	Chat with self prevented	Tap Interested on own post	Guard in place — no self-chat created
25.6	Blocked user cannot chat	Block user, verify they can't message	Backend enforces block

Total test cases: **211** across **25** sections. Generated for Roominate iOS — Production Readiness QA.
